

Software Fix List — CRM / Bid Tool

From: Jordan Schiller • Date: July 13, 2026 • 8 items, screenshots included

Priority order: Item #8 (photo upload broken) is the blocker — please fix first. Items #3 and #4 are related data-model issues; review together.

1 Lead form needs file attachments FEATURE

Location: New Lead form

There's no way to attach files to a lead. We regularly receive paint specs, RFPs, and referral emails (e.g., from Sherwin-Williams) at the lead stage and need them stored on the record. Add a file upload section to the New Lead form and the lead detail view.

← Leads

New lead
Add a property opportunity and the first contact attached to it.

Name *
Nona Terrace - Full Exterior Repaint

Email
robert@cmsorlando.com

Phone
407-359-7202

Company
Community Management Services

Property name
Nona Terrace

Property address
11095 Savannah Landing Circle Orlando, FL 32832

Source
Sherwin Williams

Estimated value
500000

Scope tags
Full Exterior Repaint

☒ **Large job** (> 2 weeks — drives the takeoff & billing template)

Notes
I am assisting the community with potential color scheme options should they choose to pursue a color change.
Please let me know if you have any questions or need any additional information

Cancel Add lead

New Lead form — no attachment area anywhere on the form.

2 Rename "Attainable sq ft" to "Paintable sq ft" LABEL COPY

Location: Property Specs

Label copy fix. Both fields — "Attainable sq ft — non-floor surfaces" and "Attainable sq ft — floors" — should say **Paintable sq ft**. That's the industry term we use.

Property specs
What the property could be sold on, and what crews should know before arriving.

Attainable sq ft — non-floor surfaces Attainable sq ft — floors

Breezeways Stair systems

Maintenance history / known issues
Things crews should know before arriving — recurring leaks, fragile landscaping, gate codes handled by the office...

Save specs

Property Specs — both "Attainable" labels should read "Paintable."

3 Owner Contact dropdown shows the lead name, not the contact's name BUG

Location: Property page → Ownership section

The dropdown displays "Nona Terrace – Full Exterior Repaint" (the lead/opportunity name) when it should show the person — Robert Strembecki. It looks like contact records and lead records are merged, or the dropdown is querying the wrong field. Owner contact should always be a person's name.

Ownership

MANAGEMENT OWNER CONTACT
Community Management Services Not set

Mark which contact at this property represents the owner. The legal owner details and Notice to Owner recipient are captured later on the project pre-start checklist, not here.

— None —
✓ Nona Terrace - Full Exterior Repaint

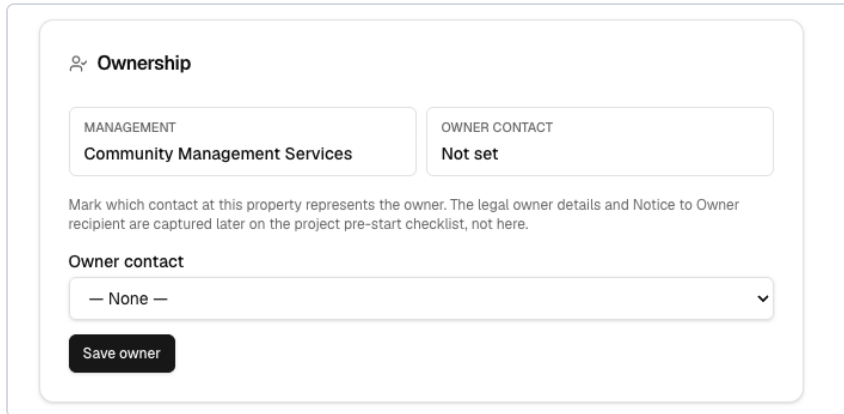

Save owner

Dropdown offering the opportunity name instead of the contact person.

4 HOA properties have no single "owner" — handle this scenario DATA MODEL

Location: Property page → Ownership section

For HOA/condo association properties there is no individual owner, so Owner Contact just sits at "Not set." Add an ownership type option like **"HOA / Association"** so we're not forced to pick an individual owner contact where one doesn't exist.

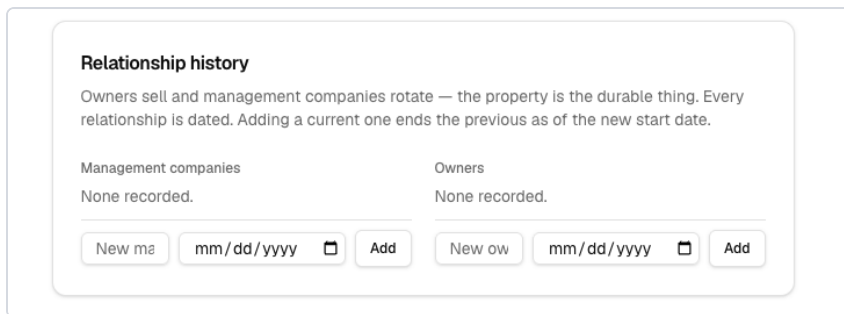

HOA property — Owner Contact stuck at "Not set" with no valid option.

5 Relationship History has no way to actually record entries BUG

Location: Property page → Relationship History

This section is meant to log management company and owner changes over time, but there's currently no functional way to save a record — both columns show "None recorded" with bare inputs. Needs a working add/save flow with dated entries (and per the existing description, adding a current relationship should end-date the previous one).

Relationship History — inputs present but entries can't be recorded.

6 Add photo upload on Property Specs FEATURE

Location: Property Specs

Would be nice to attach photos directly on the Property Specs section so specs and supporting site photos live together (e.g., breezeway and stair-system conditions).

Property specs
What the property could be sold on, and what crews should know before arriving.

Attainable sq ft — non-floor surfaces

750000

Attainable sq ft — floors

0

Breezeways

0

Stair systems

0

Maintenance history / known issues

Things crews should know before arriving — recurring leaks, fragile landscaping, gate codes handled by the office...

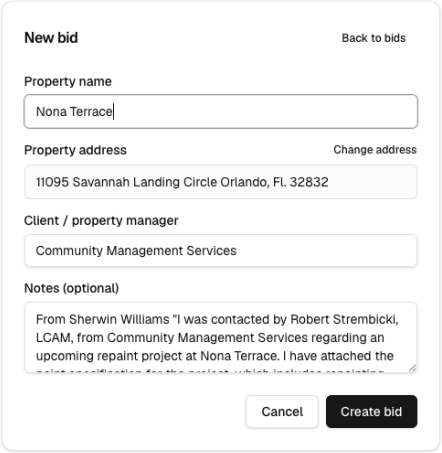

Save specs

Property Specs — no photo upload option alongside the spec fields.

7 New Bid needs a Project / Opportunity Name field FEATURE

Location: New Bid form

The bid form only captures Property Name. One property can have multiple bids over time, so we need a separate **Project / Opportunity Name** field — e.g., "Nona Terrace – Full Exterior Repaint" vs. just "Nona Terrace."

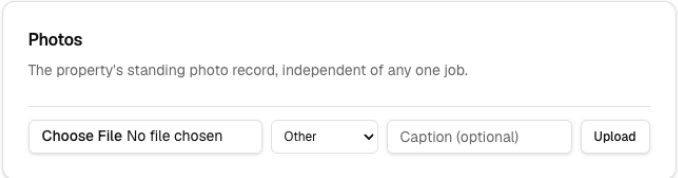

New Bid form — property name only, no project/opportunity name.

8 Photo upload is broken BLOCKER — FIX FIRST

Location: Property page → Photos section

Choosing a file and clicking Upload does nothing — no error, no upload. This is the property's standing photo record, so it's a core feature. **Please fix this first.**

Photos section — Upload button unresponsive after selecting a file.

Questions on any item — call or text Jordan.
